Creating a Call Simulation on HeySales

The Call Simulation module in HeySales.ai by Paperflite lets sales reps practice realistic buyer conversations, sharpening skills in discovery, objection handling, and closing — all in a risk-free environment.

Written by Vincy

Updated over 3 months ago

Whether it's a **discovery call**, a **cold call**, or a **follow-up**, every simulation is tailored to challenge and coach reps in real time, improving their confidence and performance with every session.

Design Your Simulation Setup

HeySales offers a flexible, simulation-driven environment where trainers and admins can:

- **Select Call Types:** Choose between Discovery Calls, Cold Calls, or Follow-ups to target specific skill areas.
- **Adjust Challenge Levels:** Scale the complexity of conversations from basic to advanced depending on rep experience.
- **Customize Company & Buyer Profiles:** Use AI to build realistic personas, ensuring every simulation mirrors actual buyer behavior.

Each simulation is automatically scored based on **conversation quality**, **prospect engagement**, and **brand positioning**, providing measurable insights for coaching.

Step 1: Setting Up a Discovery Call

To begin, navigate to: **Studio → Create Call Simulation → Discovery Call**

Add Basic Details

- **Title & Description:** Give your simulation a clear name and a brief summary. (Descriptions can be up to *1000 characters*.)
- **Thumbnail:** Add a banner image to make your simulation visually appealing. (*Recommended dimensions: 800 x 180 pixels*)
- **Call Duration & Challenge Level:** Define the length of the call and indicate how challenging it is for the learner. (*Note: Challenge level is informational—it doesn't control actual difficulty.*)
- **Skill Tags:** Tag key skills on the right panel, such as "Objection Handling" or "Active Listening." You can also manage and add sub-skills via the **Admin → Manage Skills** section.

This setup ensures your simulation is well-structured, engaging, and aligned with your coaching goals.

Step 2: Adding Company and Buyer Profiles

A well-defined profile makes your simulation realistic and effective.

Customer Company Profile

The **Customer Company Profile** provides context for the scenario. You can:

- Manually create it, or
- Use **SEEK (AI assistant)** to auto-generate realistic company details such as:
 - Industry type
 - Company size and revenue
 - Tech stack and other business specifics

You can also use the **Shuffle** feature to randomize or reuse pre-existing scenarios.

- Use **Main Shuffle** for all sections (Company, Buyer, and Buyer Needs)

- Or shuffle each section individually

Buyer Profile

The **Buyer Profile** defines the persona that your sales reps will engage with. This section helps the AI understand the buyer's mindset, background, and objections.

Fill in:

- **Persona:** Describe the buyer — years of experience, expertise, tone, and communication style.
- **Designation:** Indicate their level of authority or buying power.
- **Profile:** Add background details such as education, experience, or specialization.
- **Personality:** Choose from types like *Friendly*, *Analytical*, *Assertive*, or *Skeptical*.
- **Voice:** Pick a preferred accent or voice style for the simulation.

- **Objection Tendencies:** Add common friction points or pushbacks your reps should handle.
- **Example Statements:** Add how objections could be raised and possible responses.
- **Small Talk:** Personalize the conversation with light, contextual openers.
- **Success Metrics (KPIs):** Define measurable outcomes such as qualifying the lead, scheduling a demo, or identifying the buyer's intent.

The screenshot shows a web browser at app.paperflite.com/coaching/manage/simulations/draft/68bfb8cb39137546da23a7bc. The interface is titled "Scenario" and includes a sidebar with icons for various actions. The main content area is divided into two sections. On the left, there's a text input field with the placeholder "Need help with the brief?". On the right, a red-bordered box highlights a detailed buyer profile for "Sophie Carter".

Buyer Profile Details:

- Name:** Sophie Carter
- Age:** 29, lives in Berlin, Germany
- Designation:** Marketing Manager, hybrid worker
- Profile:** Sophie is someone who develops and executes digital campaigns to boost brand visibility and customer engagement. She manages content, social media, and analytics to drive growth and support business objectives.
- Personality:** Overwhelmed (Subtext: Busy, stressed, reactive, overworked)
- Voice:** Elliot 25 years old male, Canadian, soothing, friendly, professional
- Objection Tendencies:**
 - Price Sensitivity** – Worries that the final price might be higher than advertised (hidden fees, baggage costs, etc.).
 - Trust Concerns** – Hesitant to book with a platform she's unsure about; needs strong guarantees and reviews.
 - Flexibility Doubts** – Unsure if she can easily change or cancel flights without heavy penalties.

Buyer Needs / Objectives

This section establishes the context for the buyer's goals and challenges, helping the AI simulate realistic interactions.

Include:

- **Prospect Objectives:** Define what the buyer is trying to achieve.
- **Company Pain Points:** Outline key business problems (e.g., low retention, poor efficiency).
- **Assessment Questions:** Add questions the bot can ask the rep (e.g., *"What solutions do you recommend to improve productivity?"*).
- **Accepted Responses:** Define ideal answers or best practices reps should follow.
- **Deal Killers:** Note what statements or actions would immediately end the deal.
- **Opportunity Triggers:** Add cues the AI can use to test reps on upselling or cross-selling opportunities.

← Scenario

Generate a objectives with seek

Type your persona...

This profile is focused on identifying the goals of the prospect, understanding their pain points, and formulating assessment questions. The aim is to uncover acceptable responses from the sales representative while identifying potential deal killers and opportunity triggers.

Prospect Objectives

To establish a clear understanding of the prospect's needs and to identify solutions that align with their objectives.

Company Pain Points

Challenges related to inefficient processes and lack of integration in their current systems.

Assessment Questions

What specific challenges are you currently facing with your existing solutions?

Acceptable Responses

Responses that demonstrate a clear understanding of the prospect's industry and the challenges they face.

Deal Killers

Inflexibility in pricing or unwillingness to customize solutions.

Opportunity Triggers

Signals of urgency in addressing current pain points or dissatisfaction with current providers.

Step 3: Assessment

Each simulation includes built-in evaluation criteria that measure performance across critical skills, such as:

- Conversation quality

Conversation quality	Pace	Number of words spoken by the salesperson per minute
weightage for this assessment: 10	Talk ratio	Percentage of time a salesperson spends speaking during a call
	Filler words	Count of words or sounds like "um," "uh," "like," or "you know" that people use during a conversation to fill pauses while thinking, and which don't add meaningful information to the conversation
	Longest monologue	Duration of the longest continuous speech delivered by a salesperson during a call, essentially measuring the longest uninterrupted time a rep spent talking on a single call.
	Patience	Amount of time a salesperson waits after a customer finishes speaking before they start talking again
	Question rate	Average number of questions a sales representative asks per hour during a call

- Prospect engagement

Prospect Engagement	Rapport building	Was the salesperson able to build a rapport based on any common ground like location, experience, passion, interests?
weightage for this assessment: 10	Prospect interest	Was the prospect engaged, showing interest and participation?
	Responsiveness	Was the prospect responsive to key qualifying questions?
	Intended Outcome	Was the intended outcome of this conversation discussed with in the first ten minutes of the call.
	Agenda	Did the salesperson set an agenda and discuss the agenda for this conversation?

- Brand positioning

Brand Positioning

weightage for this assessment:

10

Build Confidence

Was the salesperson able to position and build confidence about the brand

Build Relevance

Was the salesperson able to reference similar customers in the same industry or with similar problem areas?

- Understanding Buyer Needs

Understanding Buyer Needs

weightage for this assessment:

10

Uncover Need

Did the salesperson uncover their primary pain points and challenges?

Problem Understanding

Was the salesperson able to establish their understanding/research of the buyer to the buyer

Problem Acknowledgment

Did the buyer acknowledge these as business-critical problems?

Solution Relevance

Did the salesperson discuss or indicate a relevant solution to the painpoints brought up by the buyer?

Define success

Were they open about their goals and what success looks like?

Demonstrate Expertise

Was the salesperson able to reference similar customers in the same industry or with similar problem areas?

- Buying intent Qualification

Buying Intent Qualification

weightage for this assessment:

10

Buying Intent Qualification

Did they express a clear need for a solution?

Urgency

Was there urgency in solving their pain points?

Budget

Did they mention a budget or willingness to invest?

- Decision Process & Authority

Decision Process & Authority

weightage for this assessment:

10

Decision makers

Did you identify key decision-makers and influencers?

Decision makers

Did they share details about their decision-making process?

Decision makers

Do they have authority or influence in the decision?

- Next Steps & Call Progression

Next Steps & Call Progression

weightage for this assessment:

10

Next Steps & Call Progression

Was a follow-up meeting or next step agreed upon?

Next Steps & Call Progression

Did you get a commitment for further evaluation (demo, pricing, POC)?

Next Steps & Call Progression

Did you summarize key insights and align expectations for the next meeting?

- Objection Handling

Objection Handling weightage for this assessment: 10	Objection Handling	Objections were proactively addressed with strong responses
	Objection Handling	Prospect seemed reassured or satisfied with responses
	Objection Handling	No unresolved concerns left at the end of the call

- Competitive Positioning

Competitive Positioning weightage for this assessment: 10	Competitive Positioning	Prospect mentioned competitors & seemed convinced of differentiation
	Competitive Positioning	Unique value proposition stood out against competition

These metrics help learners see exactly what they did well — and where to improve.

Before publishing, preview the entire simulation to experience it as a learner would. Make any necessary adjustments for clarity and flow.

The screenshot shows the Paperflite coaching simulation interface in a web browser. The URL is `app.paperflite.com/coaching/simulations/68bfc07339137546da23a7c4`. The interface is divided into three main sections:

- Test Section:** Features a large video player with a "Start Call" button. Below the video, it shows a duration of "10 Minutes" and a "Discovery Call" label. The "Description" section provides background on Kiwi.com, a travel-tech company connecting flights and transport across 750+ carriers, handling 100M+ daily searches and selling 40,000–70,000 seats each day. It mentions the tech stack (React.js, Python, Django, Node.js, PostgreSQL, Redis, Elasticsearch, AWS, Docker, Kubernetes, BigQuery, Airflow, Kafka) and tools (Jira, Confluence, Slack). A typical persona, Sophie Carter, is introduced as a hybrid Marketing Manager who drives digital campaigns but faces inefficient processes. Her goals include understanding prospect needs and identifying aligned solutions, while deal breakers are inflexible pricing or lack of customization.
- Organization Info Section:**
 - KIWI:** Kiwi.com travel-tech company that connects flights and transport across 750+ carriers using its Virtual Interlining technology. The platform handles over 100 million daily searches, selling 40,000–70,000 seats a day. With around 1,200–2,000 employees, Kiwi.com generates revenues exceeding €1 billion and is majority-owned by General Atlantic.
- Persona Section:**
 - Sophie Carter:** Age 29, lives in Berlin, Germany
- Objectives Section:**
 - To establish a clear understanding of the prospect's needs and to identify solutions that align with their objectives.

Assigning Learners

Once your simulation is ready, you can assign it to specific users or user groups within **Paperflite**. This enables easy tracking of:

- Who has completed the simulation
- Who is yet to begin
- Overall learner performance

Step 4: Reviewing Results and Feedback

Once learners complete the simulation, they receive a detailed performance report, including:

- **Overall Score**
- **Call Recording and Transcript**
- **Metric-wise Evaluation**, such as:
 - Conversation Quality
 - Prospect Engagement
 - Buyer Intent Qualification
 - Next Steps and Progression

Learners can click on each evaluated parameter (like “Buying Intent Qualification”) to see a detailed breakdown, helping them learn from their performance.

They can also **replay call recordings** and **review transcripts** for self-assessment.

The platform handles over 100 million daily searches, selling 40,000–70,000 seats a day. With around 1,200–2,000 employees, Kiwi.com generates revenues exceeding €1 billion and is majority-owned by General Atlantic.

Persona

Sophie Carter

Age 29, lives in Berlin, Germany

Objectives

To establish a clear understanding of the prospect's needs and to identify solutions that align with their objectives.

Setting Up a Cold Call Simulation

Cold Call Simulations train reps to:

- Confidently initiate conversations
- Handle objections in real-time
- Secure follow-up meetings

The setup process is similar to Discovery Calls — the only difference is that **Cold Call reports** include an additional metric:

Brand Positioning — evaluates how effectively the rep represents your organization's value proposition.
