

Phonics Instructions

Overview

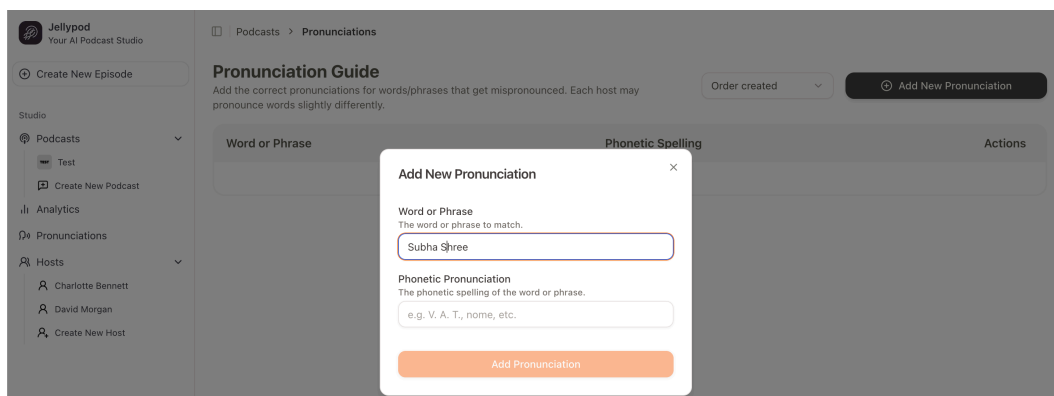

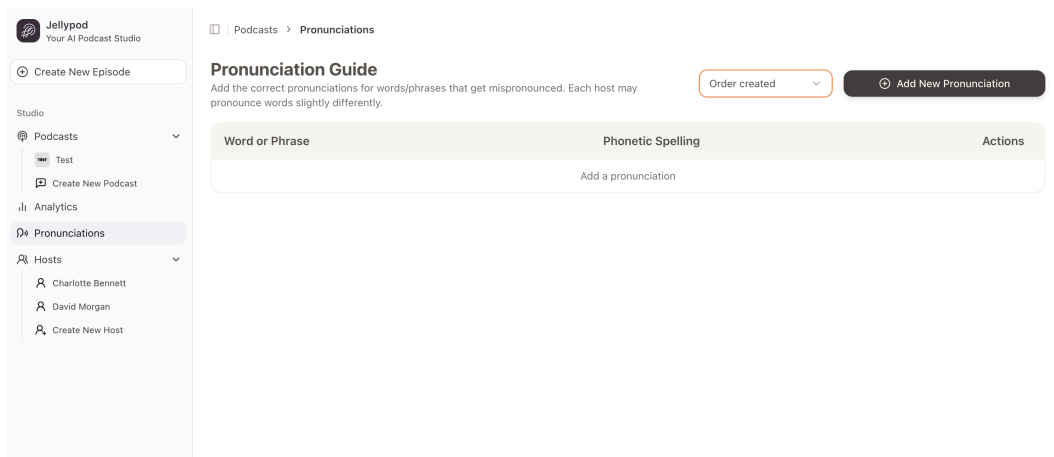

With this implementation, we will be introducing the ability to add phonic instructions for words in podcasts.

Reason for Prioritisation

It was on the roadmap and additionally, Evolus is facing an issue with Evolysse/Jeauveux - vital word for their learnings being mispronounced across their podcasts.

Research

JellyPod

BeyondWords

Acceptance Criteria

Functionality

- User will be able to add phonetic spelling of a word in order to edit its pronunciation.
- **Phonetic instruction for a word should apply to the word globally i.e across podcasts.**
- User will be able to preview the pronunciation and save it.
- User will be able to access phonic guide where he can manage all phonic instructions - and delete any phonic instructions previously saved in the same at any point in time.

UI/UX

Within edit studio

- On the right side panel, next to the transcript tab, there will be an edit phonics button.
- Clicking upon it will open the phonics instruction guide on the left hand side.
- User can add the word and the phonetic spelling in the slider and save it.
 - while adding the word, there should be clear indication of how many instances the word is found in across how many podcasts.
- User will be able to preview the pronunciation before saving it.
- Once saved, the instruction will get added to the list in the guide, which the user can at any point in time delete later from the guide.
- **After entering the instruction and saving it and playing any podcast, the word must be pronounced as per the instruction.**
