

Elevator Pitch - Framework Defect

The implementation for the defect fix will include the filtering of assessment frameworks based on call type which was not picked in the first phase of custom assessment framework.

Implementation Criteria

- Only scorecards that are marked with a call type will show up in assessment framework options while setting a simulation.
- **Please note these rules will not apply for elevator pitch.**
- Scorecards that are marked as 'all' will show up for all calls i.e discovery and cold today.
- The scorecard that is marked as default will be default and automatically be 'all' and will show up as default for all call types and show up as default.
- **For elevator pitch, only frameworks with explicitly labelled as elevator pitch will show up.**
