

Reports

Metrics to be shown to be users based on their role:

- Admins
- Sales Coaches/Managers
- Course Creators
- Learners
- Leadership

Admin

Ensures the organization is engaging with learning, content is being created, and adoption targets are being met.

Metric	Objective	Filter
Active learners	Track the number of users actively engaging with the learning platform.	-team/usergroup -time period
Active creators	Track content creation by course creators ensuring setup for learning	-team/usergroup -time period
Completion Rate by Team	Assess how effectively teams are completing their assignments.	-team/usergroup
Ramp-up Rate	Track efficiency, speed and active participation from reps.	-team/usergroup
Number of Learnings Completed	Track the total learnings finished across the platform.	-team/usergroup -time period
Number of Learnings Published	Monitor the volume of new learning assets added.	-team/usergroup -time period
Time Spent Learning (by type)	Quantify engagement/adoption	-team/usergroup -time period -user
Skill proficiency	Track which teams have actively learnt and mastered skills. Teams that have the highest number of learning completions mapped to each skill.	
Revenue Impact	Track the business outcome that has come as a result of learning. Teams that have the highest number of	

learning completions correlated with their opportunities closed.

Definitions

		To agree	Note
Active learners	No. of learners who have engaged with learning in the past 'x' days This can be learners: -who completed any 1 element in a course(meaning if they have completed at least one lesson or assessment) -who have completed a simulation enough(i.e more than 2 minutes) to get a report -who have completed listening to a podcast(or spent 'x' minutes listening to podcast) -also include enrolment	What is the definition of learning completion? Should it be learnings completed or learnings passed? what if a user has completed a learning but has failed in it? Is he an active learner?	
Active creators	No. of creators who have at least on published learning in the past 'x' days		
Completion Rate	Out of the learnings assigned/enrolled - how much have been completed?		
Ramp-up Rate	Number of days from assignment/enrolment to completion(pass).		

Sales Manager

Tracks team learning progress and skill development - identifies areas for improvement/targeted coaching.

Metric	Objective	Filter
Completion Rate of Their Team	Measure how many assigned trainings their team successfully completes.	-team/usergroup -user
Skill Breadth	Identify which skills and how widely they are distributed within a team.	-team/usergroup
Skill Depth/Proficiency	Highlights mastery of the skill - also highlight which skills teams need more work on	-team/usergroup -user
Learning Points Leaderboard	Highlight the top learners with highest completions/points and high scores.	-team/usergroup -user

Learnings(Calls in specific) Completed	Assess how effectively reps are preparing/learning	
Top Readiness Reps	Highlight reps that have high average scores across simulations. (if its average, how we do we handle number of simulations)	
Avg. Score % across the call types	Average performance across all learnings completed - split by call type	-team/usergroup -user -skill
Call simulation evaluation	Show team's average scores across call simulation aspects - prospect engagement, conversation quality,etc. - radar chart	-team/usergroup -user -time period -call type(cold, discovery, followup)
Challenging Simulations	Highlight which simulations have very low scores so that managers can identify areas of improvement for reps.	-team/usergroup -user
Avg. score across calls and courses - impact on revenue	Assess how performance in learnings(especially call simulations) are having an impact on revenue i.e opportunities closed.	-team/usergroup -user
Improvement in Calls	Pinpoint how much each call skill (e.g., questioning, negotiation) has improved in a given time period.	-team/usergroup -user -time period This can also be shown as trend in the above char(improvement in %)
New Skill developments	Signals the rate of up-skilling within a given time period	can be shown as trend
Most Developed Skill/Call Aspect	Highlight the skill with greatest proficiency gain in the timeframe.	-team/usergroup -user -time period Insights drawn out of the above data

Definition

Skill Depth/Proficiency	Number of learnings completed with that skill mapped		
Improvement in Call Aspects	Score in the last call of the given time period (-) Score in the first call of the given time period		This can also go to leadership as call readiness

Course Creator

Monitors how their content is used, completed, and its impact on learner performance.

Metric	Objective	Filter
Completion Rate	% of learnings completed out of the learnings created by the creator	Dropdown - courses created by me
Avg. Ramp-up Time	Avg. duration from assignment to completion for learnings created by the creator.	Dropdown - courses created by me
Avg. Score	Track Learners' performance - across the learnings they have created	Dropdown - courses created by me
Time Spent	Time spent on the learnings they have created	Dropdown - courses created by me
Retakes, Attempts to Pass	Measures learning curve of the learnings they have created	Dropdown - courses created by me
Self-Enrolments	Shows content value/reach	Dropdown - courses created by me
Top Learnings	Creator sees which of their learnings have the highest completions.	

Highest Reach Learnings	Creator sees which of their learnings have the highest self-enrolments.	
Challenging Learnings	Creator sees which of their learnings have taken the highest attempts to pass or high failure rates.	

Learner

Tracks personal progress, identifies strengths and gaps, and benchmarks against peers to guide their learning journey.

Metric	Objective	
Learning Completions/Leaderboard	Learner to see his position in terms of levelling up	To agree on if we want to go via the learning points route
Completion %	Shows if learner is keeping up.	
Avg. Score in Learnings	Personal average performance	
Skills Breadth and Depth	Number of unique skills attempted/mastered and depth per skill ("skill points" - meaning number of learning points achieved mapped to that skill)	
Avg. Call Score Split by Call Type	Track Performance in different real/sim calls.	
Improvement Trends in Call Aspects	Personal growth over time in each call skill.	
Current Learnings: In Progress/Not Started	Active queue management.	
Peer Comparison	Relative standing to others on key metrics (completion rate, learning completions/points, skills).	

Definitions

Learnings Points	Every time a learner completes a learning - his score out of 100 becomes the points. Meaning if a user completes 2 learnings with scores 76% and 82% respectively his score is 158.
-------------------------	---

Leadership

Measures how learnings are driving business - sales outcomes.

Metric	Objective	
---------------	------------------	--

Learning Completion vs. Opportunity Closure (by Team)	Link team's learning completions to opportunity won/closed rates.	To agree if we should should with learning completion or learning points
--	---	--

Filtering & Comparison

1. User/Team/Org Level Filtering

- **Dropdown or Search Bar:**

Allows users to quickly select any **individual rep, team, region, or the whole organization** to view reports specific to that selection.

- **Segment Switch:**

Toggle view between *"Myself"*, *"My Team"*, *"Other Teams"*, or *"Entire Organization"* with one click.

2. Benchmark Comparison

- **"Compare To" Toggle:**

- Buttons/Dropdown to *enable side-by-side comparison*:

- **User vs Team Average:**

E.g., "How does Kennie's Learning Points compare to Team Paperflite's average?"

- **User vs Org Average:**

E.g., "How does Kennie's Skill Proficiency in Closing compare to Org Average?"

- **Team vs Other Teams:**

E.g., "Region South vs Region North on Skill Mastery."

- **Benchmark Lines in Charts:**

- Add a labeled line or shaded area to every chart showing team/org average.
-

3. Time Period Selection

- **Date Range Picker:**

Filter all data by specific periods: last week, last month, quarter, or custom date range.

4. Additional Filters

- **Learning Type:**

Filter by course, simulation, podcast, or all combined.

- **Skill:**

See reports filtered down to a single skill or grouped category.

- **Status:**

Show only "In Progress," "Completed," or "Not Started" statuses.

Best for coaching new sales reps

Turn mid-performers into top sellers

Identify and correct skill gaps early and immediately. Then, enable managers to scalably coach their sales teams from any device — systematically improving the performance of their teams. Score and use these practice sessions to build confidence and coach reps on the finer points of a winning sales presentation. Bring sales reps up to the level of top performers, while still leaving time to close deals.

Udemy

Go beyond engagement metrics to see what's really working

Employee sentiment reports will tell you what's resonating with your team and reveals the impact of learning. Only Udemy offers ratings and reviews data to help fuel your learning strategy.

Use learning data to drive business outcomes

Monitor learning with at-a-glance dashboards

User-friendly dashboards surface critical metrics and trends. You can drive engagement with our Adoption Dashboard or discover popular content through Course Insights.

Reading the Scorecard

Total Readiness Overview

The scorecard is top-lined by an overall readiness score, which itself is an average of two other averages: one representing learners' **academic readiness** and one representing **tactical readiness**.

Academic readiness represents a learner's *theoretical understanding* of a subject. The score consists of learners' lesson completions and their non-practice question scores. Academic readiness helps trainers answer questions such as:

- Are my teammates current on training? Are they working with outdated information?
- Do my teammates understand the subject matter on which they've been trained?

Tactical readiness represents learners' *applied knowledge*, their ability to apply theoretical knowledge to novel contexts or scenarios in order to solve problems and improve practices. The score consists of the average practice question score (correct v. incorrect answers) and the average **feedback criteria** score (on a scale from 1 to 5). Tactical readiness helps trainers answer this question:

- Can my teammates translate theoretical knowledge into practical knowledge by applying their learnings to simulations and practice scenarios?

Key Component Breakdown

The second half of the scorecard allows trainers to analyze the components that constitute academic, tactical, and overall readiness scores. The **key component breakdown** displays the following performance metrics:

- Assignment completion rate
- Non-practice question score
- Feedback criteria score
- Practice question score

Below the bar graph is a table in which these four scores are displayed on a group by group basis. Right-click on a group name to filter by learner or lesson title. Select X to remove a filter and return to the default view.

Flow

1. Entry Point

- **Reports** tab in the main navbar.
 - On click → user lands in a **role-specific default view**:
 - Admin → Org overview
 - Sales Manager → My Team view
 - Course Creator → My Content view
 - Learner → My Progress
 - Leadership → Business Outcomes
-

2. Global Filters (always visible, top bar)

- **Date range picker** (Last 7 days, 30 days, Quarter, Custom).
 - **Org selector** (Org → Region → Team → Rep).
 - **Segment switch** (Myself · My Team · Other Teams · Entire Org).
 - **Learning type filter** (Course, Simulation, Podcast, All).
 - **Skill filter** (dropdown/multi-select).
 - **Status filter** (Not Started, In Progress, Completed).
 - **Compare toggle** (User vs Team · Team vs Org).
-

3. Dashboard Layout (per role)

Admins

- **KPI strip**: Active learners, Active creators, # Learnings Completed, # Learnings Published.
 - **Charts**:
 - Funnel: Assign → Start → Complete → Pass.
 - Completion rate by team (heatmap or bar).
 - Ramp-up time (median Assign→Start, Start→Complete).
 - Time spent learning (stacked bar by type).
 - **Tables**: Team-level rollups with drilldown to learners.
-

Sales Managers

- **KPI strip:** Team completion%, Avg score, Skills gained, # Active learners.
 - **Charts:**
 - Team completion vs target.
 - Skill breadth & depth (bar or radar).
 - Simulation performance tiles (Discovery, Cold, Follow-up).
 - Call aspect radar (Prospect engagement, Buyer need, etc.).
 - Improvement trends in call aspects (line).
 - **Leaderboard table:** Top learners, learners needing attention.
-

Course Creators

- **KPI strip:** Completion%, Avg ramp-up, Avg score, Attempts-to-pass.
 - **Charts:**
 - My course completion funnel.
 - Attempts vs Pass% (scatter for outliers).
 - Drop-off chart (lesson-level).
 - Peer comparison (my portfolio vs org averages).
 - **Tables:** Course-level performance, Top vs At-risk courses.
-

Learners

- **KPI strip:** My completion%, Avg score, Skills earned, Call scores.
 - **Charts:**
 - My learning points trend.
 - My skills breadth & depth (radar).
 - My call simulation improvement (first vs latest).
 - **Tables:** Current learnings (In progress/Not started), Peer comparison.
-

Leadership

- **KPI strip:** Org LRS, SLA% achieved, Skills coverage, New skills.
- **Charts:**
 - Region/team readiness leaderboard.
 - Learning points vs Opportunity closure (correlation tile).

- Trend: Org-wide completion% & Avg scores.
 - **Tables:** Top regions/teams with readiness vs deal outcomes.
-

4. Drilldown Flow

- Click on any chart element (bar, line, tile) → open **drilldown view**:
 - Admins → Team → Learners.
 - Sales Managers → Learner → Attempts/Sim runs.
 - Course Creators → Course → Lesson/Question stats.
 - Learners → Asset → Feedback/Recommendations.
 - Keep breadcrumbs (Org → Team → User) to navigate back.
-

5. Seek Layer

- At the top of each role's dashboard, show **3–5 auto-generated insight cards** (natural language + CTA):
 - Example: *"Completion rate in East SDRs dropped 18% this week — Send nudge to 12 reps."*
 - Example: *"Cold Call simulations improved by +9 pts vs last month — Share best practice clip."*
-

6. Export & Sharing

- Export buttons: CSV · PDF · Schedule email.
