

Assistant

Knowledge (Seek)

Use when: The user wants a synthesized answer (talking points, counters, brief) drawn from courses/podcasts—not a list of learnings.

- Prep me to position against **XYZ competitor** for today's call—give talking points and traps to avoid.
- Give me a **2-minute brief** on **pricing objections**—top counters and when to use them.
- Teach me **Digital Sales Rooms** for discovery calls—what/why/when and key buyer pains.
- Compare **Competitor A vs B**—where we win/lose and why.
- Summarize my last **Deal Intelligence** podcast into **5 takeaways + 3 talk points**.
- Explain **security & compliance** must-knows for a **healthcare CIO**.
- What are the **critical discovery questions** for a mid-market IT buyer evaluating integrations?
- Explain our **pricing model** in plain language for non-technical stakeholders.
- Pitfalls to avoid in **multi-year procurement negotiations**—and better alternatives.

Creation (Simulations & assessments)

Use when: The user wants the system to create a practice artifact (simulation, quiz, checklist, talk track).

- Create a **dry-run simulation** for a discovery call with **XYZ** (use case: **Digital Sales Rooms**).
- Simulate objection **“price is too high”** with a skeptical **CFO persona**.

- Generate a **10-question quiz** from my last **Deal Intelligence** podcast.
- Build a **roleplay** for my next call with **XYZ** using my previous conversation notes.
- Create a **micro-simulation** for **"We already use Competitor X."**
- Convert **Security Basics** into a **5-question refresher**.

Search (Find learnings fast)

Use when: The user wants a **ranked list of learnings**

(course/lesson/podcast/simulation) filtered by facets (skill, type, duration, difficulty, status, recency, team effectiveness).

- Show **lessons/podcasts/simulations** tagged **pricing negotiation**, **<15 min**, **not completed** by me.
- Find **beginner** simulations for **cold calling <10 min**.
- List **advanced** courses on **competitive positioning** updated in the **last 90 days**.
- Find **objection handling** podcasts my **team** completed and found **effective**.
- Fetch lessons on **security & compliance** for **healthcare**, status **not started**.
- Show **assessment-prep** content for **Digital Sales Rooms**, difficulty **Intermediate**.
- Give me all material mapped to **Competitor Knowledge** that I **haven't taken** yet.
- Items I can finish in **~20 minutes** on **integration basics**.
- Simulations focused on **discovery questions** for **mid-market IT**.
- Latest courses published this **month** on **negotiation tactics**.

Recommendation (Personalized growth)

Use when: The user wants **what to do next** based on **their** skill gaps, history, and team benchmarks.

- Based on my **skill standings vs team**, recommend learnings to **close gaps**.
- I keep scoring low on **security**—give me a **remediation path**.
- I have **15 minutes daily** this week—build me a **micro-plan**.
- Recommend next **simulations** based on my **weakest rubric items**.
- I just passed **Negotiation 101**—what should I take **next**?
- Queue **podcasts** to quickly improve **objection handling**.
- Shortest path to reach **Intermediate** in **Competitor Knowledge**.
- I want to prep for **certification** in **2 weeks**—recommend a path.

Shortcuts (Fast navigation)

Use when: The user wants quick app actions/lists—no synthesis or content creation.

- **Continue** the podcast I was last listening to.
- Show the **latest podcasts** published.
- List my **incomplete** learnings **nearing due date**.
- Which **simulations** is my **team** actively practicing?
- Show my **in-progress** items.
- **Retake** the last quiz I **failed**.
- Open my saved **"Pricing Prep"** pack.
- Show my **completions this month**.
- Start the **next lesson** in my current course.
- Open **bookmarks** sorted by **duration**.
