

Due date and reminder notifications

Design file

<https://www.figma.com/design/qaFY8C6uJLROXVtFaZS9DB/heySales---Master?node-id=852-8045&t=mzqfrO6iDTLuHsOu-1>

Overview

We will be introducing the ability for creators to set due dates for their learnings and according to the due date, reminder notifications will be sent to the learners.

- This is in order to create a sense of urgency for learners targeted towards:
 - increasing completion % metric
 - increase time spent learning metric

Evolus' Usecase

- They conduct events on certain - they want to emphasise and make sure the learners complete these learnings beforehand and come to the event.

Acceptance Criteria

- Due date will apply only to assignments - not enrolments.
- Due dates will not be mandatory.

Due Date Setting

- Managers will now be able to set a due date for learnings.
- This will be optional but recommended.
- The due date can be configured of 2 types
 - specific due date

- here, the creator will have the ability to pick a particular date from a date picker
- relative due date
 - here, the creator will be able to set the **number of days from the assignment date as due**

Learners List for Managers

- Managers, in the learners list, should be able to clearly see which learners are overdue i.e:
 - learners who have not started or are in progress even past the due date
- Managers, in the learners list, should also be able to see which learners have completed late i.e:
 - learners who have completed but post the due date (first completion is post the due date)
- In general, for in-progress and not-started learners, there will be visibility into what was the due date.

My Space for Learners

- In My Space, there should be a separate section where overdue learnings are called out.
- In My Space, after entering within a learning, there must be visibility into what the due date for that particular learning is.
- Along with due date display, along with the start/resume button, there will also be number of days left displayed
 - due in 'x' days
 - due today
 - overdue by 'x days'
- The due date will not be visible for a completed learner - meaning if he had completed once.

UI Cards

- Across the platform, due date(if added) should be attached to learnings as a metadata.
- In these cards, there should also be clear indication like in the start/resume button inside the learnings:
 - due today
 - overdue by 'x' days

Reminder Notifications - Email and Push

The reminder notifications will be sent out to learners when they have not completed the learning:

- The assignment notification(that exists today) must also indicate the due date if added
 - 50% duration between the date of assignment and the due date
 - meaning if the assignment happens on December 1st and the due date set at the time of assignment is December 31st - the time period is 30 days, thereby the notification should be triggered on December 16th - 15th day.
 - if in case it was 31 days(odd number), in this case also we'll do 15th day.
- 7 days before the due date
 - this email will be triggered only when date of assignment was more than 30 days from the due date
- 3 days before the due date
 - this email will be triggered only when date of assignment was more than 10 days of date of assignment
- 1 day before due date
 - if time gap is 2 days - only this mailer should go likewise.

- The assignment notification(that exists today) must also indicate the due date if added.
- If a previous assignment is now updated - either added due date or due date updated - a notification email must be triggered for that as well.
 - For now, if re-assignment happens in any way - the previous setting should not be overridden - currently as existing in production.
 - this is limited to in-progress and not started learners.

All the above notification emails will have the same template/design that is existing for assignment with the only changes being copy.

Due Date

Due Date

☒ No Due Date
 ☐ Time from enrollment
 ☐ Date

Due Date indicates to the **Learner** when they are required to complete the **Online Course**.

Admins will be able to clearly tell which **Learners** exceed the **Due Date**, using either the **Course Enrollments** or **User Enrollments** report and referencing the **Due Date** column.

Utilizing the **Due Date** setting does not remove access to the **Online Course** for a **Learner**.

This setting has three selectable configurations:

No Due Date: This **Online Course** does not have a **Due Date**. This is the default setting.

Time from enrollment: The **Due In** setting will be revealed, allowing you to set a period of time. After the period of time has passed based on the the date of enrollment, the **Online Course** will be flagged as **Due**. The **Learner** will also be made aware of how long until the course is **Due**.

Due In (Required)

Years

Months

Days

Date: The **Date Due** setting will be revealed, allowing you to set an exact date and time that the **Online Course** will be **Due**.

Date Due (Required)

Increase your **Learner's** completion rates through timely communication including a new set of due date reminders and enhanced **Course** overdue communication.

Edit Activity Page

Updated 1 year ago

FOLLOW

The **Edit Activity** page is accessed in a few different locations across the **Admin Experience**. This page allows an **Administrator** with the correct **Permissions** to modify, or update information related to an **Enrollment**. Options including modifying a **Score** or changing the **Status** of an enrollment.

Due date and reminder notifications

5

Expiry & Due Date are the sections where these values can be modified for an enrollment. Each element contains a date selector button that, when clicked, will allow an **Administrator** to pick a date. Once a date is selected, a second field becomes accessible allowing you to refine the time of day. The date set for either **Expiry Date** or **Due Date** will be applied when the **Edit Activity** page is saved.

Expiry Date

Expiry date of enrollment.

Date

(UTC-05:00) Eastern Time (US & Canada)

Due Date

Due date of enrollment.

Date

(UTC-05:00) Eastern Time (US & Canada)

When you initially land on the **Course Enrollments Report**, you will be prompted to choose a **Course** to return information on.

Actions

- Add Enrollment
- View Historic
- Back

The page will launch using the standard **Report** layout where an **Admin** can:

- Manage **Enrollments**
- Create new **Enrollments**
- Re-enroll **Users**
- Un-enroll **Users**
- Edit **Users**
- View **User Transcripts**
- Message **Users**
- View **Historic Enrollments**

Canvas LMS

View Due Date

The screenshot shows a form titled 'Assign To'. At the top, there is a dropdown menu with 'Everyone' selected and a close button (X). Below this, there are three rows of date and time selection fields. The first row, 'Due Date' and 'Time', is highlighted with a red rectangular box. Each row consists of a date picker (calendar icon) and a time dropdown (arrow icon). To the right of each row is a 'Clear' button. The second row is labeled 'Available from' and the third row is labeled 'Until'.

The Due Date and Time are the date and time when the assignment is due. Student assignments submitted after the due date will be marked as late in the Gradebook. Due Dates are not required in Canvas, but they are helpful in managing course workflow and deadlines.

Skilljar

Adding Due Dates to Published Courses

Updated 2 months ago

[Follow](#)

Add optional due dates to your published courses via their settings pages in your Skilljar dashboard. Course due dates allow you to give students a set number of days or months that they must complete the course after they've enrolled.

Skilljar admins can also see if a student has completed a course before the due date or is overdue in the "Due" column of your Skilljar dashboard's enrollments analytics page. To learn more about enrollment and due date analytics, see our [Enrollments Analytics help article](#).

- **Note:** A course doesn't expire after the due date and students can still access the content even after a course is overdue. To prevent students from accessing a course after a certain date, you must set an access expiration date. To read more about course access, see [Setting an Access Expiration Period for a Course](#).

Student experience

Students can view the due date of their enrolled courses and if their course completion is overdue in the Registrations table within their ["My Profile"](#) page. If a due date is assigned to a course they've registered for, the Enrolled column will show the enrollment date and then the due date underneath. If they haven't completed the course by the due date, it will read "Overdue."

- **Note:** Students can still access content even after a course is overdue.
