

Course Completion Screen

From a learner's perspective

When I finish a course, I want to see:

1. Celebration of completion

- A clear "You did it!" state with course name/date.

2. Skills gained

- A list of all skills the course was tagged with that I now achieved as a result of completion
- If the course had multiple assessments tied to different skills, each skill should be mapped to the assessment(s) that validated it.

3. Performance (assessments case)

- Show my score %

Benchmarks vs. peers

- **Scores** → comparison with peers - score percentile.
- **Time to complete** → my time vs. the median/percentile.
- **Attempts to pass** (if cleared in first attempt) → top percentile who cleared in the first attempt

Progression (if I have retaken the course)

- You improved +10 % since your first attempt.

UI FLOW

- "Congratulations! You've successfully completed *{Course Name}* on *{Date}*."

Skills Earned

- **"You've unlocked {n} new skills: {Skill 1}, {Skill 2}, {Skill 3}."**

Your Performance

- **"Your latest score % is x -"**
 - **You are in the top 20 percentile of learners who have completed this learnings**
- **"You completed the course in 2 hours."**
 - this is faster than 70% of the learners
 - the average time taken was 1 hour
- **"It took you {n} attempt(s) to pass."**
 - you are in the top 1% percentile who passed this in the first attempt

Where You Stand Now -post the completion

- **Leaderboard - learners with score %**
 - has the learner now gone up or down in the overall leaderboard

Progress (if retaken) - Great Progress!

- **"You improved your score by +{Δfirst} points since your first attempt and + {Δprev} points since your last attempt."**
