

Call redaction

With this implementation, we will be doing call redaction for real call assessment - calls that flow in from Zoom/Fireflies/Team integrations.

Redaction is the process by which we will be censoring personal/private information like credit card credentials, etc.

Implementation Criteria

- Before passing calls to LLM for assessment, the call redaction process has to happen.
- The transcript that is passed to evaluation will be the redacted transcript only.
- The transcript that is shown in the evaluation reports UI can still be the original transcript.
- The redaction process has to happen for:
 - real call scoring via integration with Zoom/Fireflies/Teams integration
 - real call scoring via manual upload
 - upload call for simulation extraction
- Technicalities around storing the redacted transcripts and storing original transcripts should be confirmed by @Manuj Sharma @Anant Bhat, please.

@Manuj Sharma - Please update and confirm the technical implementation for the same.
