

Call Library

Objective

- The objective of this task is to build a UI to show real call scoring feature - previously the only output of real call scoring was CRM notes.
- With this implementation, we will be listing all Zoom calls that are evaluated as part of Real Call scoring.

Design File

<https://www.figma.com/design/qaFY8C6uJLROXVtFaZS9DB/heySales---Master?node-id=14753-1738&t=eYTg39N3u6rep2n6-1>

Scope

Includes:

- All real calls scores to be listed in UI
- Expansion of each call should have its report
 - score number
 - detailed parameter breakdown
 - CRM notes i.e positives, observations, suggestions
 - recording

Does not include:

- Search for calls list
- Filtering in calls list
- mapping deal
- upload call for scoring in empty state

Acceptance Criteria

- Each call on the call list must display:
 - summary of the call
 - please note - this is not positives - summary of the entire call conversation
 - prospect email(s)
 - rep email
 - date of call
 - time of call
 - mapped deal name
 - mapped deal value
- In the detailed page of each call i.e upon clicking:
 - duration of call is to be displayed along with emails or rep and prospect(s)
 - real call score number
 - positives, observations, suggestions
 - detailed parameter breakdown report
 - recording of the call
- There should be no duplication in the list of calls
 - every call listed should be unique
- The calls should be arranged in order of recency - latest to oldest
 - calls taken today will be displayed as today
 - calls taken yesterday will be displayed as yesterday
 - calls taken before yesterday will be displayed as this week week
 - calls taken before this week will be displayed as last week
 - beyond that we will show as previous month
- There should be no blank space in any of the tabs within a call

- either error message saying this call did not have enough data to assess
